

Research Paper Outline

Laser Technology

Introduction: Laser technology is something in our lives that we use almost every day, but don't even think about it. It has been used to make huge scientific findings and can help us in many ways.

a) Who created the Laser?

- I. When was it created?
- II. How did they come up with the idea?
- III. Why did they create it
- IV. The difference between the MASER and the Laser

<http://inventors.about.com/od/lstartinventions/a/laser.htm>

b) How do lasers work?

- I. How long does it take to build them
- II. What technology has to be put into them
- III. How are they built

<http://inventors.about.com/od/lstartinventions/ss/LaserWorks.htm>

c) What can they be used for?

- I. What was the first laser used for?
- II. Medicine
- III. Environment
- IV. Research
- V. measurements

Conclusion: Laser technology has had a huge impact on the world. The laser has helped us in many ways that people can't solve alone. Without it, we would have a lot more problems to solve.
